What will I walk away with?

The sale price is the number people talk about. The number that matters is what reaches your bank account after the loan is paid off and the closing costs come out. This worksheet gets you close to it in about ten minutes.

Fill in what you know. Leave a line blank if you don't know it yet; the notes under each line say where the number comes from. Page 2 shows the same math on an example home.

	Expected sale price What a buyer is likely to pay, based on recent nearby sales. Not the Zillow number.	
−	**Mortgage payoff** Every loan and home equity line on the home. Your lender gives the exact payoff; your monthly statement is a close start.	
−	**Deed doc stamps** A Florida tax: $0.70 per $100 of the sale price. Multiply the price by 0.007. The seller customarily pays it.	
−	**Owner's title insurance** Florida sets the rate: $5.75 per $1,000 up to $100,000, then $5.00 per $1,000 up to $1 million. Who pays it is negotiated in your contract.	
−	**Title company fees** Settlement fee, title search, lien search and courier. In Orange County the settlement fee alone usually runs $350 to $800. Ask the title company for a quote.	
−	**Brokerage fees** What you agree to in your listing agreement, plus anything you agree to offer toward the buyer's agent. Every fee is negotiable.	
−	**Property taxes, prorated** Florida taxes are paid at the end of the year, so the seller credits the buyer for January 1 to closing. Last year's bill ÷ 365 × days owned this year.	
−	**HOA or condo charges** Estoppel letter, transfer fees and any dues owed at closing. Your association can tell you.	
−	**Repairs or credits to the buyer** Anything you agree to fix or pay for after the inspection.	
=	**Estimated cash to you at closing**	

WORKED EXAMPLE

A $400,000 home in Orange County

A fictional home, closing June 30, with a $210,000 loan payoff and last year's tax bill of $5,600. The seller agreed to pay the owner's title policy and $20,000 in total brokerage fees, and gave the buyer a $1,500 repair credit. Your own numbers will differ.

	Sale price	$400,000
−	Mortgage payoff	$210,000
−	Deed doc stamps $400,000 × 0.007	$2,800
−	Owner's title insurance $575 on the first $100,000 + $1,500 on the next $300,000	$2,075
−	Title company fees Settlement fee and title search, typical Orange County amounts	$600
−	Brokerage fees As agreed in this example	$20,000
−	Property taxes, prorated $5,600 ÷ 365 × 181 days	$2,777
−	HOA or condo charges None in this example	$0
−	Repair credit to the buyer	$1,500
=	**Estimated cash at closing**	**$160,248**

What moves the number most

The price and the payoff, by a wide margin. After those, the brokerage fees and anything agreed after the inspection. The state-set items, doc stamps and title insurance, barely move once the price is known. The full walk-through is in the video What Does It Really Cost to Sell a Home in Florida?

Want your real numbers?

I'll run a net sheet on your actual home: today's comparable sales, your payoff and your county's figures. A phone call, and usually not a long one.
